

Nama : Ferza Reyaldi
NIM : 09021281924060
Mata Kuliah : Keamanan Jaringan Komputer

Tugas Pertemuan 2 (Pertemuan 12)

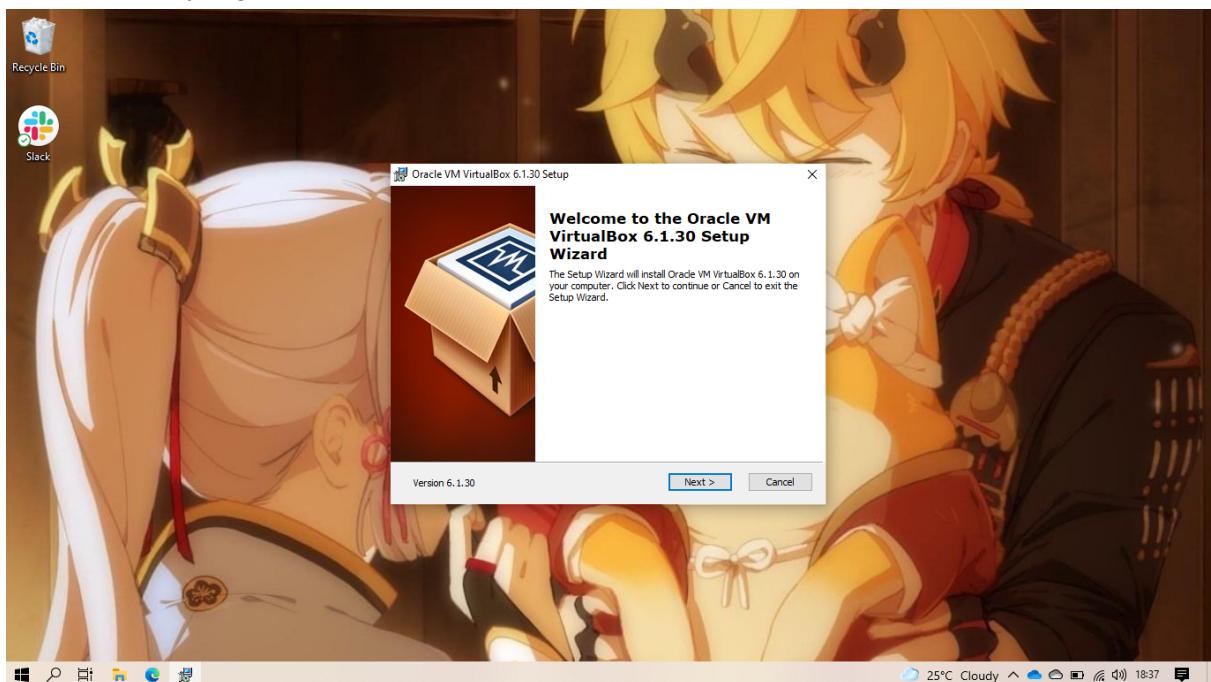

Menyiapkan security lab untuk keperluan ethical hacking

Menginstal VirtualBox

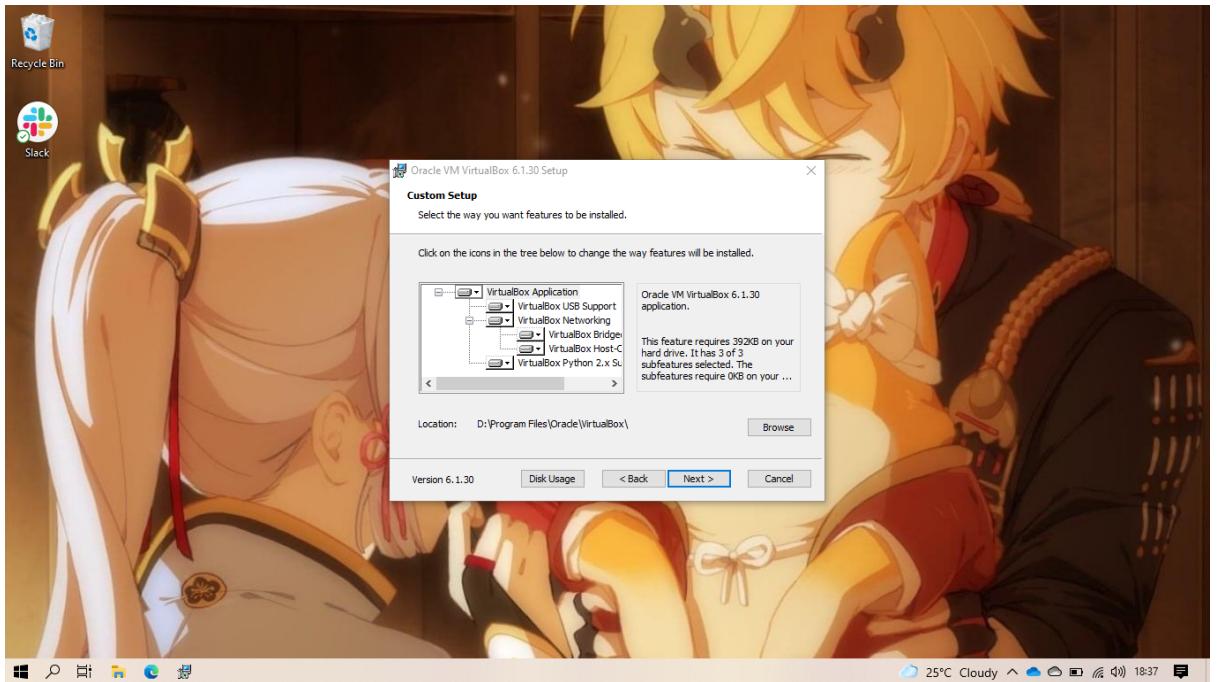

- 1) Buka website <https://www.virtualbox.org/wiki/Downloads>

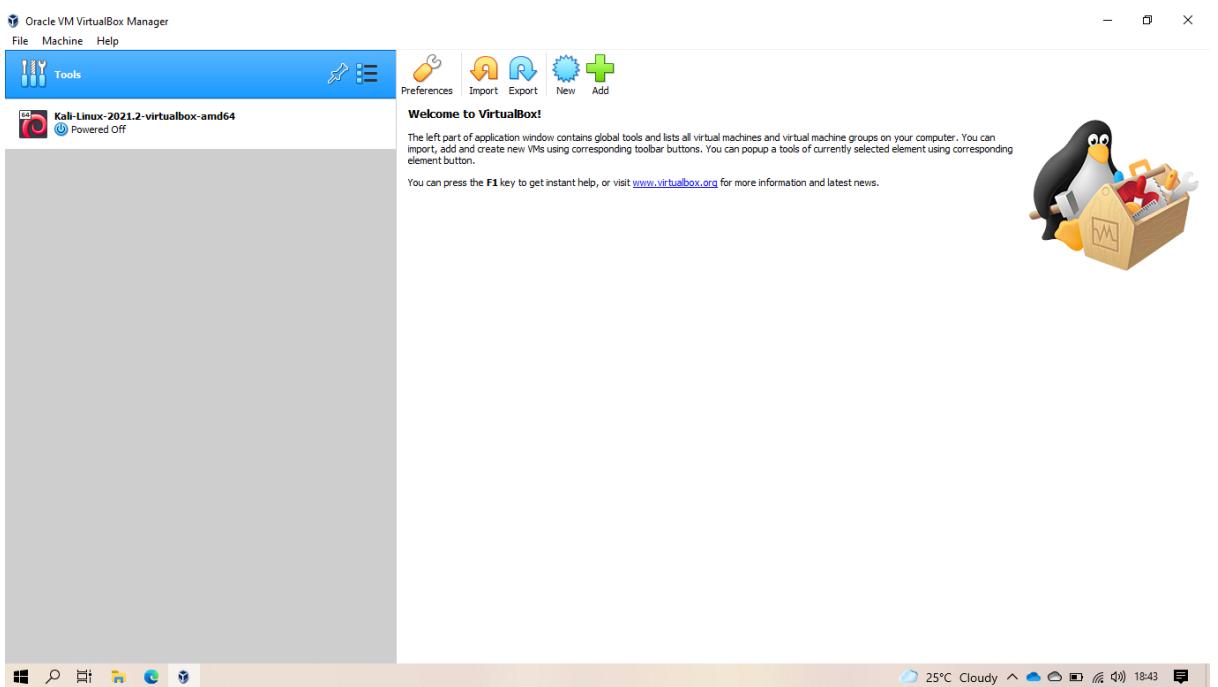

- 2) Unduh virtual box sesuai operasi sistem komputer anda.
- 3) Buka installer yang telah diunduh.

- 4) Pilih direktori tempat menginstal virtualbox, tekan next.

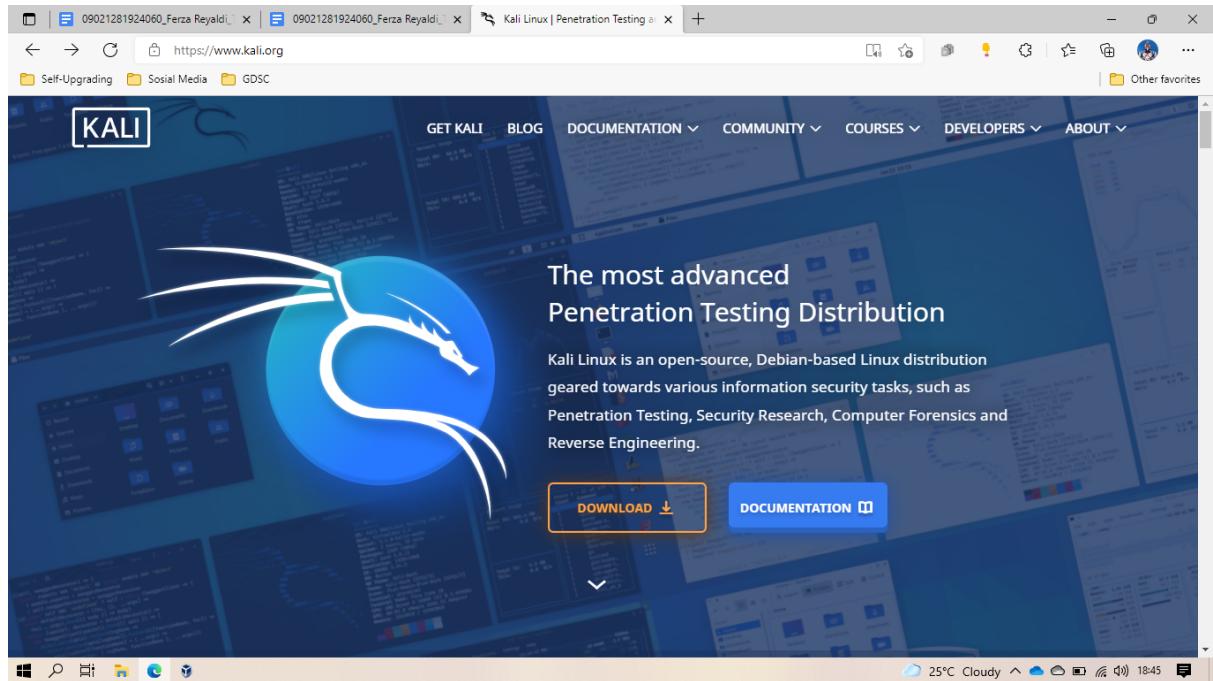

- 5) Tunggu instalasi sampai selesai. Kemudian tekan finish. Virtualbox telah berhasil diinstall.

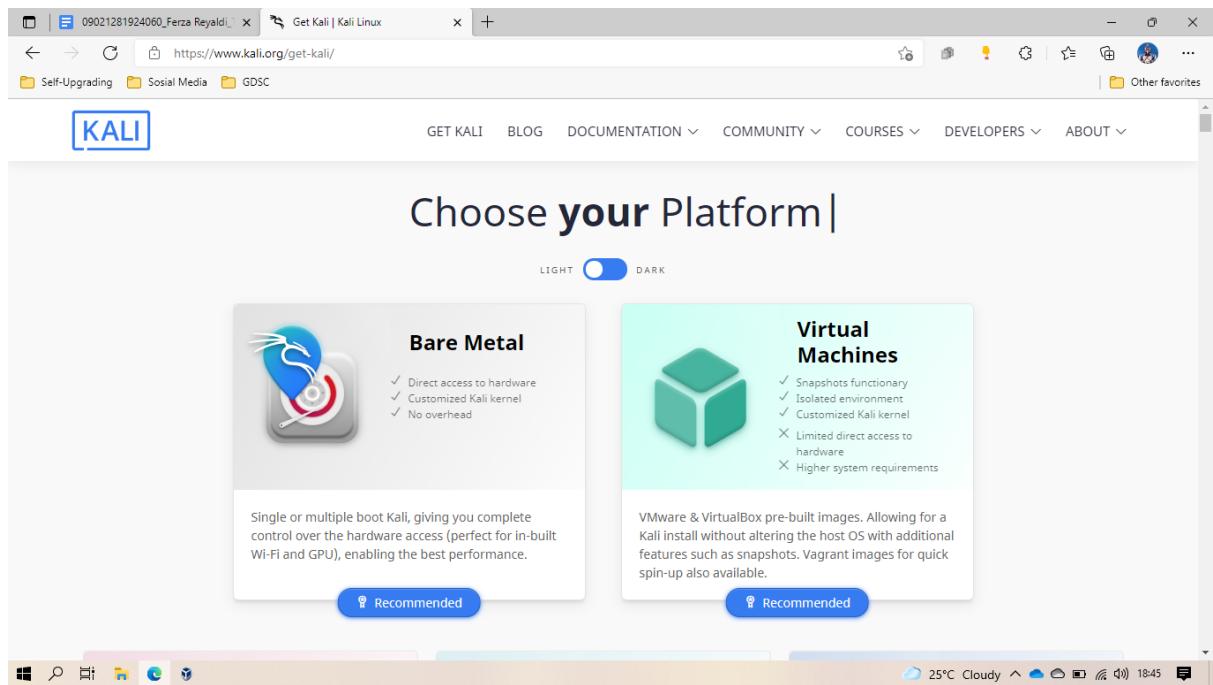

Menginstal Kali Linux di dalam VirtualBox

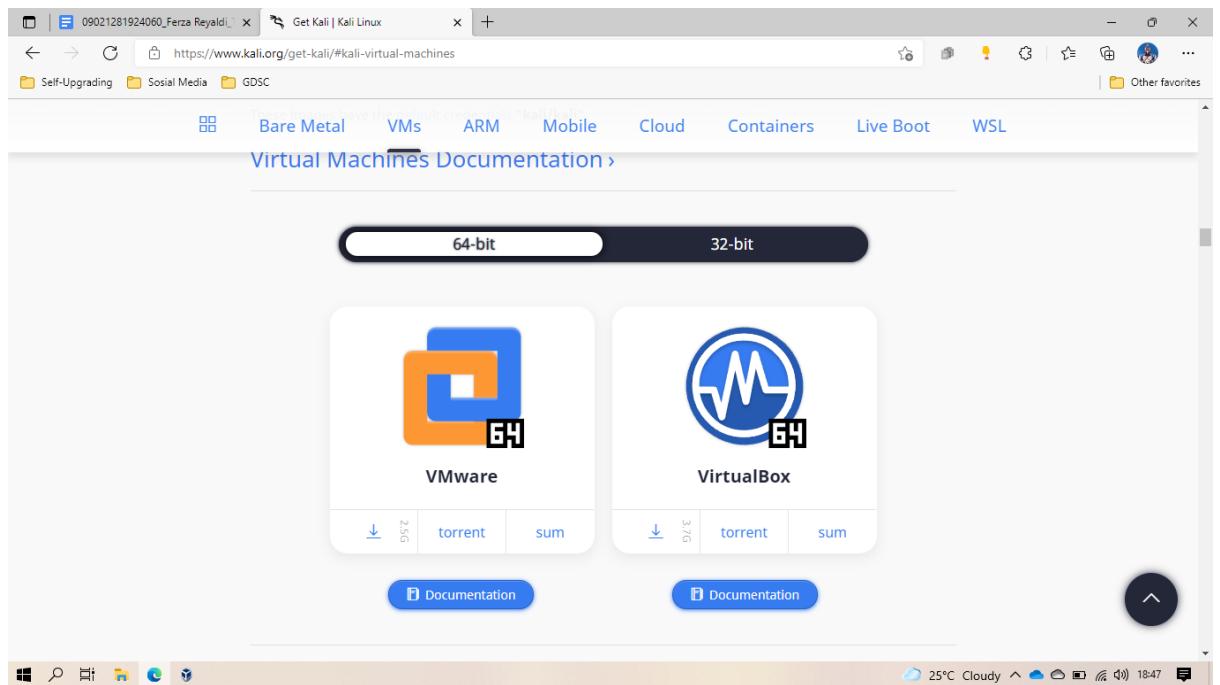

- 1) Buka website <https://www.kali.org/>
- 2) Tekan tombol download

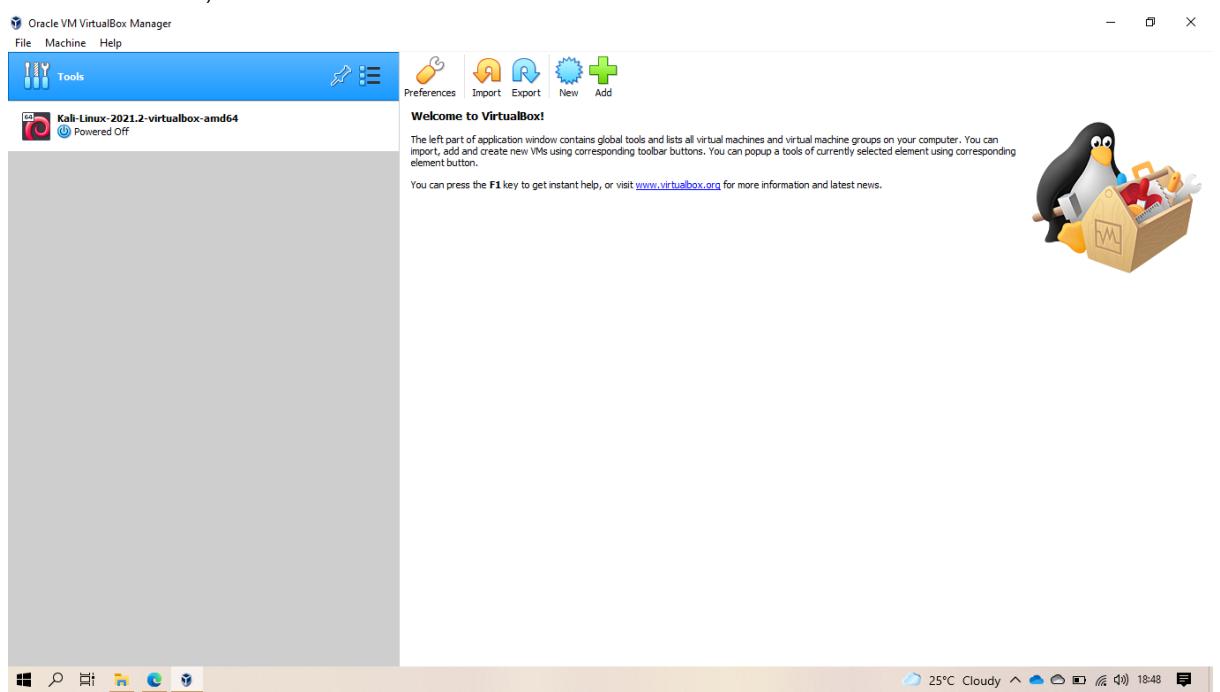

- 3) Pilih virtual machine.

4) Unduh kali linux untuk virtualbox.

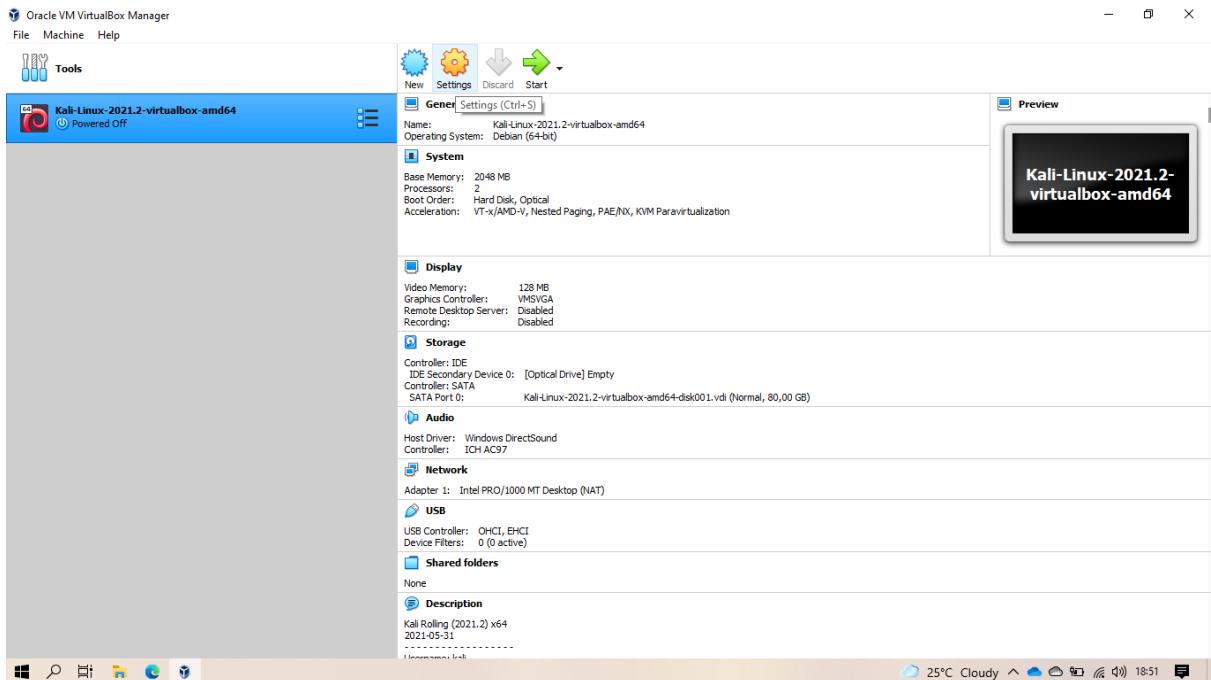

5) Buka virtualbox, tekan tombol New.

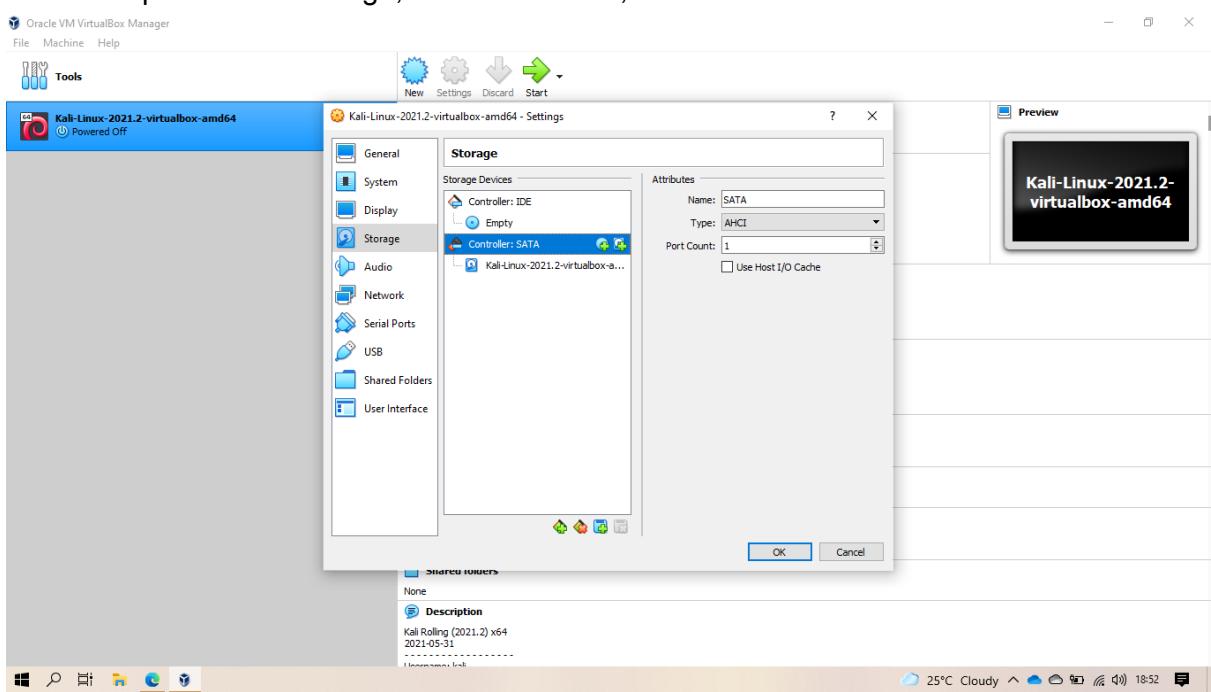

6) Kemudian atur semua pengaturan sesuai kebutuhan.

7) Kemudian klik setting.

8) Kemudian pada menu storage, di controller IDE, masukkan ISO Kali linux.

- 9) Kemudian start, mulai proses instalasi kali linux di virtual machine yang telah dibuat.
- 10) Berikut tampilan kali linux setelah berhasil diinstal.
